Anaconda Navigator and all the packages required are installed by all the team members. Software requirements are satisfied.

Anaconda Navigator Installation

Anaconda Navigator is a free and open-source distribution of the Python and R programming languages for data science and machine learning related applications. It can be installed on Windows, Linux, and macOS. Anaconda is an open-source, cross-platform, package management system. Anaconda comes with so very nice tools like Jupyter Lab, Jupyter Notebook, Qt Console, Spyder, Glueviz, Orange, RStudio, Visual Studio Code.
